Know Your Digital Cameras

Start to use

NOTE: Batteries and TF card are not included in package
Please format the memory card before using the camera.
Please insert the standard memory card and check the compatibility or the card.
Do not take out or insert the memory card when recording, otherwise, it would damage the card or cause the date loss! Some memory card may cause the camera crash or irregular work

1.Charge The Battery

Install the battery in the machine properly, contact the camera with the charger via the standard USB cable. Also can contact the camera with the computer for charging.

2.Installing and using TF Card

You must insert and use TF memory card: recorder will store all recorded images and video on the card. Max. card size is 32 GB.

Check small Diagram on base of recorder for correct orientation of TF card before installing.

- 1.Push the TF card into the slot until it is completely inserted and latched.
- 2.To remove / replace the card, lightly press in the inserted card and it will be ejected.
- 3.The TF card has to be formatted first: Press OK button and then press Right button to enter Setup Menu. Press Up and Down buttons to select 'Format' option. Press OK

button twice to select 'Yes' option. The memory card will be formatted automatically.
NOTE: All the previous DATA in card will be deleted when TF card is formatted.

3.Power ON / OFF the camera

- 1.Power ON: press the Power button for 2 to 3 seconds to turn the recorder ON.
- 2.Power OFF: press the Power button for 2 to 3 seconds to power OFF.
- Auto Power OFF: When recorder has been left idle for 1 minute, the recorder will turn OFF automatically. The automatic power OFF delay time can be set at 1,3, or 5 minutes. In Video or Camera Mode, press OK button, then press Right button to enter Setup mode, select Power Save and make adjustment if necessary (see Section 9 Setup the recorder).
- 3.Low power: When the batteries become exhausted, the LCD display will display low battery icon and the Auto Power feature will turn the recorder OFF

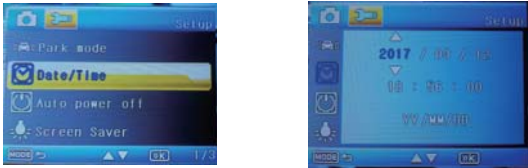

4.Selecting the MODE of the camera

When activated,the camera is set in the Camera mode
Press the MODE button to change or select desired mode:
Camera mode(default mode)-taking still photos,images
