

L1 LABEL PRINTER INSTRUCTIONS

Step1. GET STARTED

- 1 To install the label properly, pull out the transparent label lead completely to the paper exit.
- 2 To turn the printer on or off, press and hold the power button.
- 3 The red light will illuminate if the label is either absent or incorrectly installed.

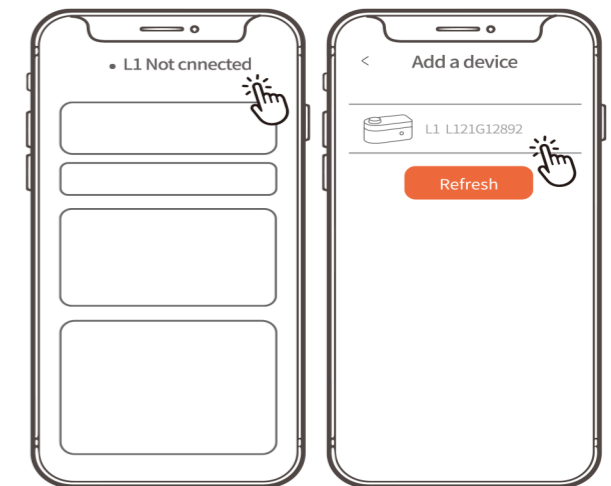

Step2. DOWNLOAD THE APP

- 1 Scan the QR code on the left to download the app directly.
 - 2 Search for "MakeID-Life" on App Store or Google Play and download the app.
- ⚠ The app is only for mobile devices, not computers.

Step3. GET CONNECTED

- 1 Turn on the bluetooth and open the APP
 - 2 Search and connect to the device by clicking the top-right corner of the app.
- ⚠ If you connect to Bluetooth through settings, it will not work.

Since our printer and app development needs to comply with Google's low-power Bluetooth communication protocol requirements, we need to obtain the location permission of the Android device in order to search and connect when searching for devices.
