Inserting the Memory Card

Insert the Micro SD memory card to record and store your videos and photos. When the battery is low, media stored on the memory card will not be erased. Please insert the Micro SD memory card by following the steps below:

1. Insert the memory card. Ensure that the metal contacts are inserted first. Push the memory card down until you hear an audible click.

The memory card can only be inserted in one way. Do not force the card in if it will not go in smoothly.

2. To remove the memory card, simply push in and the card will eject out.

Instant Print Mode

Installing the print paper:

Note :

***Please follow the correct direction for paper installation. If put it in wrong direction, it can not print with image.**

Close paper slot door. **Please make sure to leave an extra 1 inch of paper.*

***Make sure to place the paper in the middle of the card slot when closing the door, make sure the slot door is completely closed to prevent the paper from coming out during printing.**

Printing while taking photo:

Method 1: Press ③ in Photo Mode to turn **on/off** the print mode. When taking photos, the camera will automatically print black and white photos, while color photos will be saved on the memory card.

Method 2: Press ③ to turn print mode on when view photos in Playback Mode , then press to ② print photo.

*When the print mode turns on, the icon ③ will show on the right top of the screen.

Note:

***Choose suitable print density and print mode(in setting menu) at different situation to improve the print image.**

***If the camera doesn't print, please check whether the paper is fixed in a wrong way.**

Q&A

Q: What kind of adaptor I should use to charge the camera since the adapter is not included in the box?

A: Please use 5V-1A adapter to charge the camera (not included), lower or higher than these voltage can harm the battery and circuit.

Q: How to connect the camera to a PC?

A: 1. Please check if SD card is inserted into the camera.

3. Use the USB data cable to connect the camera (on status) to the computer.

3. After the computer is successfully connected and the " icon is displayed on the screen, indicating that the computer detects and reads the information of the camera, and automatically installs the camera. (You only need to install the driver at the first time you connect to the computer. No need to install again after the first connection. If the driver installation can't be completed, please change to another USB port)

4. If you use a Mac, you need an extra multi-port USB splitter to match the data.

Q: Why my camera can't turn on ?

A: 1. The camera is in low battery, please charge it when you get it.

2. The camera will turn on when it is charging. After 5 minutes, red

indicator light will be on. And the blue indicator light will be on when it is fully charged.

3.The battery will be fully charged about 2-3.5 hours.

Warm Reminding

1. Recommend to use high quality class 10 micro SD card, max support 32GB with FAT 32 format.
2. Don't loosen the USB connection and plug out the micro SD card while downloading file from camera.
3. Do not recommend to use camera when it is in charging.
4. When the camera fill light is turned on, do not aim it at the child's eyes to avoid injury.
5. When the camera can not print, please check whether the paper installed correctly and whether the print mode is turned on.
6. Do not put the product near fire;
7. The packing contains important information. Retain for future reference.
